

Product information

For sales and service personnel

Final shutdown of the cooling function with Thermia iTec air / water heat pumps

On the following devices the cooling functionality can be permanently switched off, on the next described way. Cooling is never switched on at factory setting in the inside control module.

Physical shutdown of the cooling function

When DIP1 is switching OFF, is the outdoor unit only allowed to do heating (cooling is blocked)

Switch setting into the outside unit

KEY	ON (default)	OFF	
DIP1	Heat Pump	Heating Only	
DIP2	Anti-stack snow mode OFF	Anti-stack snow mode ON	
DIP3	Silence operation		
DIP4	DIP3	DIP4	Mode
	ON	ON	Silence mode Step.1
	ON	OFF	Silence mode Step.2
	OFF	ON	Silence mode Step.3
OFF	OFF	Silence mode Step.1	

De actieve koelfunctie van de Thermia Itec bij werd defintief uitgeschakeld door de installateur JES warmtepompen.
